Scope and Topics

The MCIS 2012 Conference Committee invites submissions of **track proposals** that address the design of web services, along with their business models, as well as the development and implementation of information systems that enhance the use and application of knowledge and expertise in a global scale, with the aim of supporting co-creation and the development of innovative solutions to the economic and social challenges that the World faces today. Tracks that can accept papers within the following topics, but not limited to the following, are welcomed:

- Theories and research methods;
- Information Systems that support knowledge management and innovation in organizations and society;
- Crowd wisdom, crowd creation, crowd funding, and crowd democracy: initiatives and platforms;
- Ubiquitous and mobile participation;
- Web 2.0 business models;
- Green Information Systems
- Collaboration and negotiation information systems;
- Risk management and systems;
- Social media, network analysis;
- Intelligent tools to process large amounts of information.
- Cases of Crowdsourcing to promote social well-being
- Cases of Crowdsourcing to promote social well-being

Submission of track proposals

Track Proposals (2 A4 pages maximum) should be sent by **October 31st, 2011,** by email to Isabel Ramos (to: iramos@dsi.uminho.pt, cc: rds@dsi.uminho.pt).

Proposals should include an indication of the Track Chairs (names, affiliations and contact information) and the description of aims, scope and list of relevant topics of the track. They should also include the type of accepted contributions: research-in-progress, full papers, posters.
