

Call for Participation

Undergraduate Conference in Information Systems (UCIS) 2014

Information Communication Technologies (ICT) in the Enterprise and Beyond

An Association for Information Systems (AIS) Chapter Conference

Friday, February 28 & Saturday, March 1, 2014, Pittsburgh, PA USA

The Undergraduate Conference in Information Systems (UCIS) is designed as a forum for undergraduate students with an interest in Information Systems to present their work and engage in relevant discussions with peers, faculty and experts in the field from around the world. This conference is a chapter conference of the Association for Information Systems (AIS) and is hosted by Carnegie Mellon University.

Submissions in line with the conference theme, **“Information Communication Technologies (ICT) in the Enterprise and Beyond,”** are encouraged. Over the past several years, innovations in information and communication technology (ICT) have changed the way we do business, interact and communicate (both professionally and socially), engage in commerce, and receive government services. The field of ICT has been promising to revolutionize our lives in both small and large ways. The hope is that this forum can be used to discuss the promises and capabilities of ICT and how it can be used to improve organizations, while also considering its possible negative impacts and failures.

List of Relevant Topics

UCIS welcomes submissions that address research and practice topics congruent with the conference theme. UCIS also welcomes submissions on traditional topics related to IS in general. These topics include, but are not limited to:

- | | |
|---|--|
| • ICT in Businesses, Governance, and Commerce | • Strategic Use of Information Technology |
