

**POSITION ANNOUNCEMENT  
MANAGEMENT SCIENCE AND INFORMATION SYSTEMS DEPARTMENT  
OKLAHOMA STATE UNIVERSITY**

The Management Science and Information Systems (MSIS) Department in the Spears School of Business at Oklahoma State University invites applications for a tenure-track Assistant Professor position slated to begin in Fall, 2016. The position is located on the main Stillwater campus.

OSU's MSIS Department has a unique blend of faculty, students and staff, delivering innovative academic programs at the undergraduate, master's and doctoral level, producing impactful and high quality research, and providing outstanding service to the profession, the university, the college and to the community. Faculty are located in both Stillwater and Tulsa, and can teach classes in both locations and/or on-line as well.

The Department is a national leader in Information Assurance (IA), having long been designated a National Center of Academic Excellence in IA Education (CAE/IAE) and Research (CAE-R) by the NSA and the Department of Homeland Security. This designation comes from the work of the faculty affiliated with CTANS (Center of Telecommunications and Network Security Department).

Through its graduate programs and affiliation with SAS's Data Mining Certificate program and significant faculty research in the area, the MSIS Department has strong programs in decision support systems and business intelligence/data analytics/data science. Future plans include partnering with OSU's Center for Health Sciences and the Center of Health Systems Innovation in delivering additional graduate programs and certificates in health informatics and health care analytics.

The Department is also known for its innovative programs related to high school student outreach including the ISyTE (Information Systems Technology Exploration) Summer Academy.

While applicants with all areas of MIS expertise are welcomed, the department does have specific needs it seeks to fill. The candidate should be able to provide instructional support for classes in object-oriented/multi-paradigm programming, web-based systems development, mobile development, data warehousing, and other technical classes. The candidate should be engaged in impactful research with aspirations of publishing in top MIS journals. Finally, the candidate should have an innovative mindset and be willing to support and participate in departmental initiatives as needed.

To be considered for the position, the preferred applicant will have completed a Ph.D. in MIS or related area from an AACSB accredited university. ABD's close to finishing their degree will also be considered. Applicant screening will begin immediately and will continue until the position is filled. We intend to hold campus interviews for the position during the Fall 2015 semester. All positions are contingent upon available funding.

Applications will be accepted online at <https://jobs.okstate.edu>. **Please search for listing under faculty positions.** Applicants should upload a letter of application, resume/vitae, a list of four references, statement of teaching interest, and a summary of prior teaching evaluations. *Oklahoma State University is an Affirmative Action/Equal Opportunity/E-verify employer committed to diversity and all qualified applicants will receive consideration for employment and will not be discriminated against based on age, race, color, religion, sex, sexual orientation, genetic information, gender*

*identity, national origin, disability or protected veteran status. OSU is a VEVRAA Federal Contractor and desires priority referrals of protected veterans for its openings.*
