

Faculty Positions in Information Systems

Tenure-Track in Information Systems

The Department of Information Systems at National University of Singapore is one of the few departments in the world that offers a comprehensive suite of Information Systems academic and professional degree programs from undergraduate to PhD level. It has about 20 tenure-track faculty members, who received training from different disciplines and renowned global institutions. The diversity of our faculty members has allowed the department to pursue a wide variety of research topics using behavioural (both quantitative and qualitative), economics / econometrics, and design science / business technical / computational research paradigms.

National University of Singapore is currently ranked 12th in the 2015 QS World University Ranking exercise. The Department of Information Systems is also ranked among the top 10 universities based on publications in the top IS journals. Besides offering a very competitive pay package and large start-up research grants, the department also provides an extremely collegial and research-conducive environment for faculty professional development.
