

**27-29 June 2017
Madeira Island, Portugal**

ICE is the International Conference on Engineering, Technology, and Innovation. It developed from an early focus on the engineering method of concurrent engineering, to general organization of the engineering process and its organization within the corporation and in networks. Concurrency obviously addresses parallelisation of activities in time, but it comes with the broadening of decision making on

ABOUT ICE

what is wanted and how services and products ought to be. This is not decided by technical criteria alone, but includes usage, economic, environmental, and social criteria. The ICE conference therefore discusses systems engineering in the context of a comprehensive socio-technical framework task with a focus on design of products and services, and the entrepreneurial innovation process for its adoption in society and economy.

ICE 2017 Theme: "The Engineering, Technology and Innovation beyond 2020"

Conference Chairs:

Chair:
Ricardo Gonçalves (UNINOVA, Portugal)

Co-Chairs:
Alain Zarli (CSTB, France)
João Pedro Mendonça (Univ Minho, Portugal)
Marc Pallot (Arts & Métiers ParisTech, France)
