Notice of Vacancy

Position(s):	Information Systems Department, Probationary Assistant Professor
Salary:	Competitive based on qualifications and experience
Date of Appointment:	Fall 2017

Responsibilities:

The Department of Information Systems at St. Cloud State University has one open assistant professor tenure track position to teach undergraduate Information Systems and graduate Information Assurance programs. The department goals include:

- Providing an effective learning environment for student success,
- Developing and enhancing school curriculum and programs, learning outcomes assessment and continuous improvement,
- Contributing to student growth and development such as supervising student culminating projects and general advising measured by annual student survey,
- Continuing development of professional knowledge and skills in information systems and information assurance,
- Serving on committees at the department, school, and university levels,
- Assisting the school in maintaining accreditation: conducting student learning assessment, meeting ongoing research requirement, and serving on school accreditation committee as needed.

Qualifications:

Required:
1. PhD or Doctorate in Information Systems, Information Assurance, Cyber Security, Computer Science, Computer Engineering or Software Engineering from a nationally accredited academic program completed in a campus-based environment. ABD considered, but full degree requirements must be completed within the first year of employment.
2. Demonstrated expertise in two or more of the following areas: cloud computing security, security policy/risk assessment, digital forensics, database security & auditing, operating system security, software security, client/server security and secure electronic commerce
3. Evidence of teaching effectiveness or potential
4. Evidence of research activities
5. Evidence of the ability to work with persons from culturally diverse backgrounds, including students, departmental colleagues and others in the university and business community.

Desired:
1. Information systems and information assurance related experience in teaching or business.
2. Publication records or potential for establishing an active research program specializing in information systems or information assurance.
3. Working experience in a UNIX/LINUX based environment
4. Interest in undertaking leadership in the department research lab
5. Record of external funding
