

Invitation to the 5th Nordic Workshop on Digital Foundations of Business, Operations, Strategy, and Innovation

(DBOSI'23)

University of Oslo – Oslo, February 2-3, 2023

CALL FOR PAPERS

The 5th Nordic Workshop on Digital Foundations of Business, Operations, Strategy, and Innovation (DBOSI'23) aims to bring together scholars from a range of disciplines such as information systems, computer science, strategy, entrepreneurship, and others, with research interests on digital foundations of business, operations, strategy, and innovation. The call is open to submissions on a variety of related topics, but we especially aim to bring together papers exploring digital foundations in the context of sustainable development.

DBOSI's main purpose is to help junior and senior scholars with the development of their early work. The workshop is an open forum where participants will have an opportunity to present and discuss their work in progress, build professional network with like-minded people, exchange innovative ideas and overall, keep up to date on the developments within the research field. We invite submissions from multiple theoretical and disciplinary perspectives. This call is open to conceptual papers and empirical studies based on in-depth interviews, cases, surveys, secondary and "big" data, etc. We welcome submissions from experienced well-established scholars as well as young scholars and doctoral students alike.

We welcome submissions on themes connected, but not limited, to:

- Digital foundations for sustainability
- Infrastructures and data
- Digital transformation and innovation
- Strategic agility in digital transformation

Participants are expected to be present throughout the workshop, comment on each other's work and actively contribute to the discussions.

In addition to paper presentations there will be a panel debate and keynotes by both practitioners and academics. We look forward to many enjoyable and fruitful discussions during the workshop.

If you are interested in presenting your ongoing research and receive feedback from leading scholars in the field, please submit an extended abstract of no more than 2000 words (excluding references and tables). The submission deadline is Friday November 18th. Accepted papers will be announced Monday December 5th. Please see <https://dbosi2023.org/> for more information on submission.

We are in the process of securing financing and in case we are not able to fully fund the conference there will be a conference fee of NOK 2000 in addition to the cost of transport and accommodation.

The 5th DBOSI workshop follows the successful editions at Aalto University, Stockholm School of Economics and Umeå University. DBOSI'23 is hosted by the research group Digital innovation at the

Department of Informatics, University of Oslo. Local organizers are Miria Grisot, Raissa Pershina and Barbro Renland Haugjord.
