1) a short description of the workshop

An ECIS 2024 Workshop

Parsing epistemic registers in Inter-organisational interventions: a direct, theory aware experience in NEO-socio-technical research

PRESENTATION (in 350 words)

Workshop **theme** is the push towards the emergence of **a new Information Communications conversational paradigm (IC), in inter-organisational enterprise platforms in future ICT**. IC will capture and distribute second cybernetic order concepts enabling interpretation and governance in multi agency multi cultural contexts. In IC, information on concepts like actors role, awareness, and intentions, will complement the first order functional data available in current Data Processing and Distribution paradigm (DPD) used in traditional ITC.

The new IC paradigm, will complete **second order enterprise governance** with crucial **accountability** dimensions, while opening the way to the application of AI to enterprise data. Once AI paradigms will learn to cope with the intrinsically hermeneutic problem of accountability.

A workshop **Manifesto on IC** is available for prospect participants to familiarise with. Available at: *https://www.academia.edu/114993750/ An_ECIS_2024_Workshop_Manifesto_Parsing_Epistemic_Registers_in_Inter_organisational_I ntervention_A_new_Paradigm_in_ICT_enabling_Accountability_of_Change_in_Enterprise.*

IC is in development at Northumbria University, UK, for the public health and care sector, on an experimental platform.

The workshop is **by invitation,** after reviewing the applications of candidate participants. The **deadline for the submission of applications** is 11 March 2024. As part of the application, candidate participants are to submit a **position paper** of 1500 words, describing **a prospect application case for the IC paradigm** of their interest, derived from their own work experience. Concepts presented in the position paper should be intertwined with the solid concepts of the IC paradigm treated in the Manifesto. Candidates will be selected on the basis of quality and significance of their position paper.

The workshop format foresees two to six **groups**, of **four participants** each. Groups will be formed before the workshop, on the basis of position papers. These will be shared to group members before the workshop, to help develop group confrontation.

Practical scope of the workshop is **to enhance comprehension of the theme** by participants, through study before, and group sharing and discussion during, the workshop, ending with plenary session sharing of group thoughts, presented by one speaker per group.

The final result of the workshop is **the online publishing on the online AIS library of the collection of exploratory papers of 4000 thousand words by participants**, to be delivered within a couple of months of the workshop, grown out of the initial position paper, hopefully enriched by the interaction among workshop participants. Accompanied by **contributions on the theme, authored by the workshop co-chairs,** along with **a descriptive and evaluative paper on overall workshop results.**

4) submission link\site\email and other workshop info

Workshop submission email : epistemic.ecis24@gmail.com
The workshop is by invitation, after reviewing the applications of candidate participants. The deadline for the submission of applications is 11 March 2024. As part of the application, candidate participants are to submit a position paper of 1500 words, describing a prospect application case for the IC paradigm of their interest, derived from their own work experience.
Workshop Registration Deadline: 11 March 2024

Workshop Manifesto on IC is available for prospect participants to familiarise with. Available at:
https://www.academia.edu/114993750/An_ECIS_2024_Workshop_Manifesto_Parsing_Epistemic_Registers_in_Inter_organisational_Intervention_A_new_Paradigm_in_ICT_enabling_Accountability_of_Change_in_Enterprise.

Workshop deadlines
• Workshop Registration Deadline: **11 March 2024**
registration accompanied by submission of 1500 word position paper
• Workshop Acceptance Notification: **25 March 2024**

group assignment and sharing of contributions of group members shortly after
• Submission deadline for 4000 word exploratory paper: **15 September 2024**
camera ready for online publication on European Chapter of AIS online library

Workshop format and scope
Groups: form 2 to 6 groups of 4 participants.
Scope: promote IC by submission of initial position papers IC potential in their experience, improve understanding and visions through group sharing, exposure to best ideas in plenary, amelioration of papers for AIS online publishing

The final result of the Workshop
is the online publishing on the online AIS library of the collection of exploratory papers of 4000 thousand words by participants, to be delivered within a couple of months of the workshop, grown out of the initial position paper, hopefully enriched by the interaction among workshop participants. Accompanied by contributions on the theme, authored by the workshop co-chairs, along with a descriptive and evaluative paper on overall workshop results.

Workshop schedule
Break up of time of the day
08 - 13 : 5 hours of formal workshop
13 -.14 : 1 hour for lunch
14 - 16 : 2 hours of free discussion in small, spontaneous, interest guided groups

Detail of morning activity
8:00 arrival at workshop site
8:00 - meeting and group presentation
8:30 - introductory presentation of IC by chair, questions
9:30 - 90' group work, 15' each participant of 4 plus 30' group discussion 11:00 - 60' presentation in plenary by each group speaker
(10'/15'/20'/30' each, depending of number of groups) 12:00 - plenary discussion
12:45 - conclusions 13:00 - lunch

Workshop correspondence should be addressed to: epistemic.ecis24@gmail.com
